Education

PMAS(Arid Agriculture University   15-9-2018 to 15-9-2022

Bachelor of Science in Computer Science (CGPA: 4.00 / 2.99)   *Rawalpindi*

- **Relevant Coursework:** I graduated in Computer Science with a specialization in web development. Equipped with comprehensive knowledge and skills in web technologies, I am adept at crafting dynamic and user-friendly websites. My education has provided me with a solid foundation in both frontend and backend development, enabling me to create robust web solutions that meet modern standards and user expectations.

Experience

ADMK Solutions Pvt Ltd   Jan 2023 – Jan 2024

Laravel Developer   *Islamabad, I8/3*

- Proficient in Laravel framework for developing robust and scalable web applications..
- Experienced in creating RESTful APIs using Laravel for seamless integration with frontend and mobile applications.
- Skilled in database management with Laravel's Eloquent ORM and migrations..
- Expertise in implementing authentication and authorization mechanisms using Laravel's built-in features or third-party packages like Laravel Passport.
- Knowledgeable in Laravel's Blade templating engine for efficient frontend development.
- Familiar with Laravel's artisan command-line tool for automating repetitive tasks and speeding up development.
- Capable of optimizing application performance through caching, eager loading, and other Laravel techniques.
- Experienced in working with Laravel's ecosystem, including packages and extensions, to enhance project functionalities.
- Proficient in version control systems like Git for collaborative development and code management in Laravel projects.
- Strong problem-solving skills and ability to troubleshoot and debug Laravel applications effectively.

LIMS (Land Information and Technology)   Jan 2024 – continued

React Js Developer   *Rawalpindi, Askari 10*

- Proficient in building interactive user interfaces using React.js library for front-end development.
- Skilled in state management with React's Context API, Redux, or MobX for maintaining application state across components.
- Experienced in leveraging React Router for client-side routing and navigation in single-page applications.
- Proficient in integrating React components with RESTful APIs using libraries like Axios or Fetch for seamless data fetching and updating.
- Familiar with modern JavaScript ES6+ features and functional programming concepts used in React development.
- Knowledgeable in using JSX syntax for writing component templates, enhancing code readability and maintainability.
- Capable of optimizing React applications for performance through techniques like code splitting, lazy loading, and memoization.

Projects

LIMS | *React.js*
- We Created this website in React Js this website is basically monitoring website
- Developed a comprehensive web application designed to monitor and manage crop health, water levels, and other critical agricultural parameters. The LIMS Pakistan platform provides real-time data and analytics to farmers and agricultural stakeholders, enabling informed decision-making to optimize crop yield and resource utilization.
- Developed and maintained LIMS Pakistan, a web application for monitoring crop stress, water levels, and other agricultural parameters, enhancing decision-making for farmers and agricultural stakeholders.

Task Reminder | *Laravel Tailwind Breeze JS*
- I created this website myself for my client. In this project, I used a JavaScript library to implement a calendar where users can add, delete, and view tasks. Additionally, users can set task reminders for 3 days, a week, or a month in advance. This is a project I developed personally..

Ecommerce | *Laravel Tailwind Bootstrap Breeze JS Mysql*

- This is the eCommerce website I developed at my previous company. While it is not a multi-vendor platform, it includes key features such as payment integration, an "Add to Cart" function, and product placement capabilities. We also implemented different user roles, including super admin, admin, and standard user, each with specific permissions. All users are required to log in to access and manage their details

HR | *Laravel Tailwind Bootstrap Breeze JS Mysql*

- At my current position in LIMS, I developed an admin dashboard tailored for managing employee information, tracking attendance, and facilitating leave application submissions. This centralized platform streamlines administrative tasks, ensuring efficient employee management and seamless leave management processes.
